

Tank Storage Asia exhibition and conference
The leading event for the Asian tank storage industry

With 75% of the world's oil demand coming from Asia, the Tank Storage Asia exhibition and conference continues to be the perfect place for the industry to capitalize on these favourable conditions. Storage prospects in the region continue to flourish, with 280 million barrels of capacity expected to be added by the end of 2017. With predictions that sustainable storage expansion will continue over the next 10 years, there couldn't be a better time to visit or exhibit.

The two day event in Singapore to be held on September 27-28, 2017, the second largest oil and gas trading hub in the world, will bring the South East Asian bulk liquid storage industry together to network and do business in the luxurious Marina Bay Sands.
