Efficient, productive seismic acquisition equipment for subsurface exploration from Sercel

‘Our equipment meets high-productivity requirements of mega crew surveys’

Cyril Tarde, Sales & Marketing Manager for Asia, Middle East and Africa, Sercel talks to Arun Kumar Singhal, Chief Editor, DEW Journal on efficient, productive seismic acquisition equipment for subsurface exploration from Sercel

Special Report

16 ‘Global CO₂ emissions have rebounded strongly after steep drop in early 2020’

Global energy-related CO₂ emissions were 2% higher in December 2020 than in the same month a year earlier, according to IEA data, driven by economic recovery and a lack of clean energy policies

28 PETRONAS shaping the future of Malaysia’s energy landscape

Technology

10 Energy storage solution for Maersk’s first hybrid, low-emission jack-up drilling rig

Siemens Energy’s advanced BlueVault battery system is suited for both all-electric and hybrid power applications and is specifically designed to minimize emissions and ensure continuity of power on offshore vessels.

44 New pipeline integrity and budget optimization tool
